 San Diego, CA | Remote Consulting

WHO I AM

Independent medicinal chemist and strategic R&D advisor with over 17 years of experience in drug discovery, immunology, immune-oncology, ADC chemistry, and targeted protein degradation. Proven track-record leading programs from initial exploratory through delivery of Development Candidates and Pre-Clinical research representative on Clinical Development Teams. Through Alkhemy Consulting, I help emerging and established biotechs make confident, evidence-based chemistry decisions that strengthen their science, strategy, and IP.

CORE SERVICES

Service	What I Deliver	Ideal For
Platform Chemistry Due Diligence	Competitive, literature, and patent landscape analysis for targeted protein degradation (glues and bifunctional degraders), ADCs, macrocycles, and small molecules. Concise reports identifying validated scaffolds, linker-payload opportunities, and differentiation pathways.	Startups or investors refining platform scope or evaluating new targets.
Exploratory & Lead Optimization Strategy	Establish medicinal chemistry strategy from hit identification through lead optimization. Define screening cascades, synthetic feasibility, and compound prioritization to drive early discovery into development candidates. CRO and CDMO management	Teams seeking external guidance to shape or accelerate early discovery programs.
Business Development & Translational Chemistry Support	Technical and strategic support for BD, alliance, and translational activities. Define terms of collaboration, assess CMC readiness, and guide transitions from preclinical to clinical execution.	Corporate Development or R&D leaders evaluating partnerships or advancing preclinical assets.

REPRESENTATIVE ENGAGEMENT PARTNERS (Confidential Summaries)

- **Biotech with Novel Platform** – Extracellular degrader approached in drug discovery. Conducted landscape mapping and due diligence; prioritized validated chemotypes, proposed tool compound designs and identification of new indication space.
- **ADC Startup** – Recommended payload and conjugation strategy for proof-of-concept design. Established flowchart for payload and ADC selection to progress for Exploratory research providing guidance towards Lead-Optimization.
- **Confidential client with targeted protein degradation platform** – Delivered competitive intelligence and chemistry due diligence for targeted degradation asset evaluation in both molecular glues and bifunctional degrader development space.

ENGAGEMENT MODELS

Model	Details- Engagement model is flexible and negotiable
Short-Term Project	20–40 hours over 2–4 weeks · Report and slide deliverables · One-time invoice
Monthly Retainer	4–8 hours/month · Ongoing chemistry advisory and project support · Monthly invoicing
Milestone-Based	Flexible structure for BD or due-diligence support · Deliverable-based billing

All work performed under NDA or MSA; Alkhemy Consulting maintains strict confidentiality and data integrity standards.
